

My name is Martin Savage and i am a member of the British Neuroscience Association ( Certificate attached)

I have been studying Evolutionary Neuroscience for over a decade and hope to release my Article in a Neuroscience magazine called "Sage" in the not too distant future. This publication once peer reviewed is circulated globally in the world of Neuroscience.

My works focus is on the "Human Brain through evolution" and follows on from the "Triune" Brain model of Paul Donald Maclean. My Psychology/ Psychiatry model demonstrates clearly why these treatments are ineffective in the treatment of a patient who simply suffers with an "Unprocessed buried trauma" from some event in their life. I also intend to make my publication available on the Amazon platform and other digital media.

I beg you to consider other methods to "Heal" the patients "Trauma", not destroy brain cells to simply subdue them and cause further Psychological damage. I would advise you to look at the work of "Rick Doblin" and the guys at The "Multidisciplinary Association for Psychedelic Studies" In America.

Rick and his team have proven other methods are far more effective at healing "Buried Trauma" such as PTSD. The "Testimonials on their website speak for themselves. I encourage you to take a look and make an "Informed decision" about the future of Psychiatric treatment. Rick Doblin has also participated in a "Podcast" with "Jo Rogan" on "Spotify". Next time your on a journey, have a listen, Spotify is free and knowledge is power.

If after that you still believe your treatment is in the patients "Best Interest" despite killing brain cells in nothing more than a "Non Invasive Lobotomy" That's between you and your conscious.

What happened to the "Hippocratic Oath"?

DO NO HARM!

I wish you a good day

Kind regards

Martin Savage

## *Certificate of Membership*

I certify that

**Martin Savage**

is member no. 29911378 of

**The British  
Neuroscience Association**

**For the period**

**9 Jan 2024**

**to**

**8 Jan 2025**
