1 (Whereupon, the following proceedings were held:)

2 - - -

3 THE COURT: We're here on a civil commitment  
4 matter, Court File 85-PR-24-46. This is the matter of the civil  
5 commitment of David Austin Russell.

6 David Russell, I see you. Are you able to see and  
7 hear me all right? If there's staff in the room with Mr. Russell,  
8 he is on mute.

9 THE RESPONDENT: I can hear you as best as  
10 possible on crappy technology, but this is a complete forced  
11 trial. I've had no contact with the lawyer. The lawyer that you  
12 have appointed clearly has not my interests in mind. I have not  
13 been allowed to testify on my behalf at any of the hearings. I  
14 have not been allowed to present my own witnesses or evidence.

15 THE COURT: Okay. Very good. What I'm going to  
16 do is I'm going to go around the room. I'm going to introduce  
17 people. We're going to have a hearing. And if you want to  
18 testify at the end, you absolutely can. So until then, I'm going  
19 to put you back on mute.

20 THE RESPONDENT: Can I question the witnesses  
21 myself?

22 THE COURT: We will address that once we have  
23 testimony. Okay? So we're going to put you on mute now until  
24 then. Thank you, Mr. Russell.

25 All right. David Jones is here for his client.

1 Mr. Ellison is here from the county attorney's office. We do have  
2 our first examiner here, Dr. Tomford. Am I saying that correctly?

3 THE WITNESS: Yes, Your Honor.

4 THE COURT: All right. Ms. Engel is here from  
5 social services. Ms. Dannehy is here from Catholic charities. We  
6 have an observer. Any objection to the observer from the social  
7 work program, Mr. Jones?

8 MR. JONES: No objection, Your Honor.

9 THE COURT: All right. Mr. Jones, is there  
10 anything you would like to put on the record before we begin?

11 MR. JONES: Your Honor, the respondent indicated  
12 he had a desire to ask questions on his own. The appellate court  
13 has addressed this issue in the *Benson* decision, which was issued  
14 June 5th of 2023. Committed people and individuals facing  
15 commitment are not allowed to represent themselves. That is also  
16 consistent with Rule 9 of the special commitment rules which  
17 indicates that the respondent shall be represented at all times.  
18 So the respondent's request to ask questions directly is not  
19 appropriate at this proceeding.

20 THE COURT: Thank you, Mr. Jones. I always  
21 appreciate your preparedness for these matters.

22 Mr. Ellison, anything you would like to put on the  
23 record this morning?

24 MR. ELLISON: Not at this point, Your Honor.

25 THE COURT: All right. So I have a petition for

1 judicial commitment on the basis of a mental illness. I also have  
2 a petition for the authorization of neuroleptic medications. Are  
3 you proceeding on both of those here today, Mr. Ellison?

4 MR. ELLISON: That's correct, Your Honor.

5 THE COURT: Have the parties stipulated to any  
6 exhibits?

7 MR. ELLISON: Your Honor, I believe that we're --  
8 I don't know if it's a stipulation, but I believe we have agreed  
9 that Dr. Tomford's report will come in, and then on the 18th and  
10 19th Winona County filed records from Horizon Homes, Mayo Clinic,  
11 and then from Prairie St. John's; and I would offer those  
12 documents as exhibits at today's hearing. I believe there's no  
13 objection, but I'll let Mr. Jones speak to that.

14 THE COURT: Mr. Jones.

15 MR. JONES: Your Honor, I've received each of  
16 those four items. I've reviewed them. There is no objection to  
17 the Court receiving those into evidence. I would also note on the  
18 Zoom screen that my client appears to have voluntarily waived his  
19 right to appear.

20 THE COURT: All right. Thank you.

21 In looking at the filings, which I don't believe  
22 were in MNDES, I do have the examiner report. I also have the  
23 examiner present, but it's my understanding that his report is not  
24 objected to. I'll be marking that, then, as Exhibit 1. And I --  
25 January 19th is the Prairie St. John's. I'm going to mark that as

1 Exhibit 2. And I have January 18th a 26-page record. I believe  
2 that is from Mayo Clinic. That will be Exhibit 3. And then I  
3 have a 27-page record from Horizon Homes, which will be 4.

4 Any objection to that, Mr. Ellison?

5 MR. ELLISON: No objection from me, Your Honor.  
6 That makes sense.

7 THE COURT: Mr. Jones?

8 MR. JONES: No objection.

9 THE COURT: All right. Exhibits 1 through 4 are  
10 received. And the parties can proceed knowing they're in the  
11 record for purposes of their examination today.

12 (Exhibit Nos. 1-4 received into evidence.)

13 THE COURT: Mr. Ellison, anything else that we can  
14 do for you?

15 MR. ELLISON: Other than I can present testimony  
16 when the Court's ready. Otherwise, nothing from me at this time.

17 THE COURT: All right. You may call your first  
18 witness.

19 MR. ELLISON: I guess maybe I should have said  
20 first, Your Honor, is there anybody else in the waiting room? I  
21 thought that Dr. Schock from Prairie St. John's would be present.  
22 But if not, I can proceed with Dr. Tomford.

23 COURT CLERK: There is nobody in the waiting room,  
24 Mr. Ellison.

25 MR. ELLISON: Thank you. Then the petitioner will

1 call Dr. Travis Tomford.

2 THE COURT: When he arrives, do you want him to  
3 remain in the waiting room?

4 MR. ELLISON: It's Dr. Lisa Schock, Your Honor. I  
5 would -- that's fine. I can check when the hearing's done with  
6 Dr. Tomford. She can remain in the waiting room. I can check to  
7 see if she's arrived at that point.

8 THE COURT: I'll have the court clerk message you  
9 if any of your witnesses arrive. Okay?

10 MR. ELLISON: Thank you, Your Honor.

11 THE COURT: All right. Dr. Tomford, if you could  
12 raise your right hand and be sworn in.

13 COURT CLERK: Do you swear the testimony you're  
14 about to give here today is the truth and nothing but the truth,  
15 so help you God?

16 THE WITNESS: I do.

17 COURT CLERK: Thank you. You can put your hand  
18 down.

19 THE COURT: Go ahead, Mr. Ellison.

20 MR. ELLISON: Thank you, Your Honor.

21 - - -

22 TRAVIS TOMFORD, Psy.D, L.P.,

23 called on behalf of the Petitioner, being first duly  
24 sworn, was examined and testified as follows:

25

DIRECT EXAMINATION

1  
2 BY MR. ELLISON:

3 Q. Dr. Tomford, are you the court examiner in this matter?

4 A. Yes.

5 Q. And you prepared a court report; is that correct?

6 A. I did, yes.

7 Q. Is the information in that report true and accurate to  
8 the best of your knowledge?

9 A. It is.

10 Q. Did you conduct an evaluation of David Russell?

11 A. Yes. And to be more clear, a review of records. I  
12 attempted to interview him. I did briefly speak with him as noted  
13 in my report, but that -- that encounter was terminated just given  
14 his level of agitation.

15 Q. Is there anything in addition to the agitation that  
16 caused you to terminate that interview early?

17 A. Well, certainly I didn't want to create a safety-related  
18 concern in the sense he does have a well-documented history of  
19 dysregulated behaviors. And he was not only becoming elevated but  
20 accusatory and, quite frankly, very inappropriate. So it was --  
21 it wasn't going to be a productive conversation so I did make the  
22 decision to terminate it.

23 Q. Do you believe you have enough information in the  
24 records you reviewed to render an opinion in this matter?

25 A. Yes.

1 Q. Have you rendered a diagnosis for Mr. Russell?

2 A. I have. I diagnosed him with schizophrenia. That's  
3 based off the documented review of -- he's got a clear history of  
4 psychotic symptoms. He's historically carried a diagnosis for  
5 schizophrenia. I would agree with that diagnosis.

6 Q. In addition to the psychotic symptoms or -- sorry. Let  
7 me rephrase that.

8 When you say psychotic symptoms, are there particular  
9 behaviors or symptoms within that category?

10 A. He certainly ascribes to paranoid delusional beliefs,  
11 underlying themes of suspiciousness that he's perhaps being   
12 maliciously maligned, certain mood lability, irritability and  
13 agitation, which is often common features associated with a   
14 schizophrenia disorder diagnosis; but I would also say poor  
15 insight into his illness and psychiatric symptoms, particularly  
16 when he's undertreated and not medicated, which is currently the  
17 situation as well.

18 Q. To your knowledge, has Mr. Russell made threats towards  
19 any parties?

20 A. Yes. Yes. There was -- so his current hospitalization  
21 was preceded by him -- he stopped taking his medications, all of  
22 his medications, in early December. As expected, he experienced  
23 pretty abrupt psychiatric decompensation; threatening, hostile   
24 behaviors at his board and lodge facility. He was brought to the  
25 hospital. Remains opposed to medications and has made homicidal

1 statements in the sense of desire to kill others on the unit as  
2 well. So certainly that is concerning.

3 Q. Has Mr. Russell made any references to suicidal ideation  
4 or self-harm?

5 A. Not that I'm aware of recently. It's more so been  
6 outwards violence, outwards statements directed towards others,  
7 but no self-directed violence or harm.

8 Q. When you briefly spoke with Mr. Russell, did he make any  
9 statements about medications?

10 A. He did, yes. Bottom line is he made it very clear that  
11 he would be opposed to any form of scheduled medications,  
12 particularly antipsychotic medications. He referred to it  
13 repeatedly it as chemical lobotomy and noted not only that he  
14 perceives that he would not benefit from the medications but  
15 certainly that he would prefer not to take them.

16 Q. Does Mr. Russell have a significant history of mental  
17 health treatment?

18 A. Yes. He's been not only hospitalized on numerous  
19 occasions at state facilities, he's been civilly committed on many  
20 occasions. I want to say it was 11 since -- I can't recall the  
21 exact time frame, but there's been 11 prior commitments.

22 Q. If Mr. Russell's not committed here today, do you  
23 believe he would follow through with any mental health treatment?

24 A. No. It's very clear he will not.

25 Q. And what is Mr. Russell's prognosis if he does not

1 receive further treatment?

2 A. I would characterize it as extremely poor. I would be  
3 very concerned regarding his and other's safety if he remains  
4 undertreated and unsupervised, certainly until you achieve some  
5 several of psychiatric stability. I -- he needs to be in a  
6 structured supervised setting.

7 Q. And you may have partially just answered my next  
8 question, but does Mr. Russell impose a substantial likelihood of  
9 harm to himself or others?

10 A. Yes, for the reasons noted before and given that he  
11 remains undertreated from a mental health standpoint.

12 Q. In your opinion, is commitment the least restrictive  
13 alternative that's available at this time?

14 A. Yes.

15 Q. Does Mr. Russell have the capacity to consent to  
16 treatment with neuroleptic medications?

17 A. No, he is does not have sufficient insight into why he's  
18 hospitalized. He would voice his disagreement with regards to his  
19 current placement. This is, again, based off a record review. He  
20 has not taken medications. Medications would be the first-line  
21 preferred treatment of choice for his mental illness. Overall, I  
22 would characterize, again, his insight is extremely poor. For  
23 those reasons, no, I do not believe he has the capacity to consent  
24 to treatment.

25 Q. Is Mr. Russell able to make any reasoned decisions in

1 regards to different forms of treatment at this point?

2 A. Not in his current state, no.

3 Q. In your opinion, does Mr. Russell meet the criteria for  
4 a Jarvis order?

5 A. Yes.

6 Q. From your review of the records, did you come across any  
7 particular religious or social values that would impact  
8 Mr. Russell taking medications?

9 A. No. He's historically been on antipsychotic  
10 medications. He's been on long-acting injectables and has been  
11 able to reside in a less restrictive setting when taking those  
12 medications. But, again, he stopped taking those. And, no, to  
13 answer your question, I have not reviewed any, like, religious  
14 objections about taking the medications.

15 Q. And based on your statement, have the medications that  
16 Mr. Russell's previously taken been effective?

17 A. They have.

18 Q. Thank you. I have no further questions.

19 THE COURT: Mr. Jones, any questions for this  
20 witness?

21 **CROSS-EXAMINATION**

22 BY MR. JONES:

23 Q. Doctor, does my client have a substantial psychiatric  
24 disorder?

25 A. Yes. Schizophrenia would be -- would categorize as

1 such, yes.

2 Q. Some of the records seem to indicate as well psychotic  
3 symptoms as well as paranoia. Would those be aspects of the  
4 schizophrenia?

5 A. Yes, they would be.

6 Q. Could you give some examples from your work and review  
7 of the documents and records which show psychosis as well as  
8 paranoia?

9 A. Yes. Certainly with regards to the chemical lobotomy,  
10 that on its own has an undertone of paranoia and suspiciousness.  
11 I want to say he's eluded to being human trafficked on numerous  
12 occasions even during my encounter talking about repeated human  
13 trafficking. I don't get -- I wasn't able to clarify who he is  
14 referring to, but I suspect he's referring to the mental health  
15 system and some of the care and treatment that he's been required  
16 to attend as a result.

17 When we're seeing some of that provocative behaviors  
18 when he's at the board and lodge facility, it does not believe  
19 that he's able to trust anybody when he is undermedicated and  
20 undertreated and he is more prone to respond in an offensive or at  
21 times violent matter. And I think that's what we consistently see  
22 throughout his history.

23 Q. And does this mental illness impair or affect his  
24 ability to obtain food, clothing, shelter, or medical care?

25 A. My understanding is -- I -- I don't believe he has been

1 evicted from his -- the residence where he was at. If that is the  
2 case, I'm not aware of it. But certainly if his behaviors  
3 continued, I would imagine that there would be concerns regarding  
4 housing and stability. But I'm not aware of any recent concerns  
5 in that regard.

6 Q. With respect to medical care, would the symptoms or the  
7 manifestation of this mental illness impair or affect his ability  
8 to maintain medical care for himself?

9 A. Yes. His poor insight and inability to fully appreciate  
10 the chronic nature and severity of his symptoms would be of  
11 concern and serve as a barrier, yes.

12 Q. And to be fair, the manifestation of these symptoms  
13 would potentially or likely jeopardize his housing situation?

14 A. I agree with that if undertreated, yes, absolutely.

15 Q. From all of the review of the records, do the  
16 impairments then cause there to be a substantial likelihood of  
17 physical harm to himself or others?

18 A. Yes. And that is clear through the records. Again,  
19 some of his delusional, paranoid beliefs led to him engaging in  
20 some hostile, dysregulated behaviors prior to admission. And  
21 again, there's been clear threats, clear endorsement of homicidal  
22 thoughts during his current admission, which, in my opinion,  
23 clearly meets that threshold for commitment.

24 Q. In your review of the records, has there been a history  
25 of perhaps less dysfunction when he has been on neuroleptic

1 medication?

2 A. Yes, residing in a board and lodge facility. Again,  
3 there's a good temporal of that relationship when he's taking his  
4 medications. He exhibits less impulse control, increased  
5 behavioral regulation where he is able to reside, you know, not in  
6 an independent environment but certainly in some type of less  
7 restrictive environment where there's some adjunctive services  
8 like nursing staff, some supervision provided.

9 Q. Is involuntary civil commitment the least restrictive  
10 alternative which is appropriate for the respondent at this time?

11 A. Yes. Certainly a stay won't work and you couldn't  
12 pursue guardianship in this sense because the guardianship's not  
13 going to be able to impose medications, which is going to be  
14 needed to address his symptoms.

15 Q. Well, actually, that's my next question. There is a  
16 guardianship in place in this matter. And in some situations the  
17 guardianship is deemed to be a less restrictive alternative. Is a  
18 guardianship in any way sufficient to meet the needs of this  
19 respondent?

20 A. No, for the reasons stated. Medication management is  
21 going to be necessary and he's -- he's made it quite clear. He's  
22 not going to take medications without a Jarvis order in place, and  
23 a guardianship can't impose a medication.

24 MR. JONES: No further questions, Your Honor.

25 THE COURT: Mr. Ellison, anything else for you?

1 MR. ELLISON: I think just one or two follow-up  
2 questions, Your Honor.

3 THE COURT: Go ahead.

4 **REDIRECT EXAMINATION**

5 BY MR. ELLISON:

6 Q. Dr. Tomford, if Mr. Russell were not to receive further  
7 treatment, would that increase the likelihood that he would fail  
8 to meet his basic needs?

9 A. Yes, it would.

10 Q. And would that include the different needs that  
11 Mr. Jones asked you about?

12 A. Yes. I agree with that.

13 Q. Thank you. I have no further questions.

14 THE COURT: Any follow-up questions, Mr. Jones?

15 MR. JONES: No follow-up, Your Honor.

16 THE COURT: Thank you, Doctor. You are welcome to  
17 stay or you are free to go on with your day's business if you need  
18 to.

19 THE WITNESS: Thank you, Your Honor.

20 THE COURT: All right. Mr. Ellison, any other  
21 witnesses?

22 MR. ELLISON: Yes, Your Honor. I believe from  
23 court staff that Dr. Schock is in the waiting room. I call  
24 Dr. Lisa Schock for testimony.

25 THE COURT: I also want to indicate. I messaged

1 the Court clerk and asked her to message the staff present for  
2 Mr. Russell to make sure that we are aware if David Russell  
3 returns to the room and move the camera. And so that is the  
4 communication I wanted to share with you during the last witness.

5 All right. Dr. Schock, can you raise your right  
6 hand and be sworn in, please.

7 COURT CLERK: Do you swear the testimony you're  
8 about to give here today is the truth and nothing but the truth,  
9 so help you God?

10 THE WITNESS: I do.

11 COURT CLERK: Thank you.

12 THE COURT: All right. Whenever you're ready,  
13 Mr. Ellison.

14 MR. ELLISON: Thank you, Your Honor.

15 - - -

16 LISA J. SCHOCK, M.D.

17 called on behalf of the Petitioner, being first duly  
18 sworn, was examined and testified as follows:

19 **DIRECT EXAMINATION**

20 BY MR. ELLISON:

21 Q. Dr. Schock, first of all, am I pronouncing your name  
22 correctly?

23 A. Schock.

24 Q. Doctor, where are you currently employed?

25 A. Prairie St. John's Hospital in Fargo.

1 Q. What is your position at Prairie St. John's?

2 A. I'm a general psychiatrist.

3 Q. Can you please briefly describe your educational  
4 background?

5 A. I completed medical school at the University of North  
6 Dakota School of Medicine as well as four years of general  
7 residency training at UND. I am board certified in general  
8 psychiatry and licensed to practice in Minnesota and North Dakota.

9 Q. Are you familiar with David Russell?

10 A. I am.

11 Q. How do you know Mr. Russell?

12 A. He has been admitted to our hospital since the 3rd of  
13 January, and I have been his treating psychiatrist since he's been  
14 here.

15 Q. What was the basis for Mr. Russell's admission to your  
16 facility?

17 A. He was demonstrating increasingly psychotic and paranoid  
18 behavior as well as agitation.

19 Q. Have you rendered a diagnosis for Mr. Russell?

20 A. I have.

21 Q. What is that diagnosis?

22 A. I have diagnosed him as Bipolar Type I, current episode  
23 manic, severe with psychosis.

24 Q. I'm sorry. Could you repeat that one more time. I  
25 couldn't --

1           A.     Bipolar I disorder, current episode manic, severe with  
2 psychotic features.

3           Q.     I believe historically Mr. Russell's been diagnosed with  
4 schizophrenia, schizoaffective disorder. How does -- is there a  
5 diagnosis similar to those, or how do those relate?

6           A.     It is. I don't have a lot of collateral on him due to  
7 his lack of cooperation with his assessment, limited records, and  
8 his guardian had some limited information about his history. I  
9 could only really go based off what I was seeing in the hospital.  
10 Certainly, if he has demonstrated in the past a period of two  
11 weeks or more where he has demonstrated psychosis without a mood  
12 component to his illness, he would then meet criteria for  
13 schizoaffective disorder. So they are on the same spectrum of  
14 illnesses. It's just some details in terms of what I'm able to  
15 observe and what information I'm able to gather in the moment  
16 about him.

17          Q.     What types of mental health symptoms that you observed  
18 that -- or has your facility observed that influenced your  
19 diagnosis here?

20          A.     He has demonstrated significant agitation, his thought  
21 process has been tangential and at times disorganized, he has  
22 significant paranoid delusions, he poorly tolerates any type of  
23 challenge to those delusions, he has no insight into his illness,  
24 as well as poor judgment in terms of being able to participate in  
25 assessments or be open to --

1 THE COURT: I'm trying to write. We do have a  
2 court reporter and I'm trying to write some of this down. And  
3 you're doing a phenomenal job, but these are really big words and  
4 you're going really fast. If you could just take a breath, that  
5 would help me and my court reporter.

6 THE WITNESS: Sure.

7 THE COURT: Didn't mean to interrupt your flow. I  
8 just need you to take a pause.

9 THE WITNESS: That's all right. So again, he has  
10 had significant psychosis, delusions, poor insight into those  
11 delusions, as well as significant irritable mood where he's not  
12 able to tolerate a discussion about his mental health symptoms.

13 BY MR. ELLISON:

14 Q. You mentioned paranoid delusions. Are you able to  
15 provide any examples?

16 A. His belief that people in the hospital are sexually  
17 assaulting other patients; his delusions against staff having some  
18 kind of thing against him to where they're trying to illegally  
19 hold him in the hospital and inject poisonous medications against  
20 his will; that this diagnosis of a schizophrenia or schizophrenia  
21 spectrum illness is not true. He will get some interesting  
22 fixations on various staff believing that, you know, the shoes  
23 that a nurse is wearing, for example, means something, and he has  
24 interpreted that as being something against him.

25 Q. To your knowledge, has Mr. Russell expressed any threat

1 towards other people at the hospital?

2 A. He has. He has made threats to kill peers as well as  
3 threats to harm staff at times throughout his hospitalization.

4 Q. For the threats towards staff, do you know if there's a  
5 particular threat such as punch or any type of physical injury?

6 A. He has spat on staff.

7 Q. Has Mr. Russell been placed on a particular floor or  
8 unit at Prairie St. John's?

9 A. He is currently on our high acuity floor for patients  
10 who are struggling to function in the milieu of a less acute  
11 environment, has a higher staff-to-patient ratio.

12 Q. Has Mr. Russell been cooperative at all with treatment  
13 at your facility?

14 A. He has not.

15 Q. Has Prairie St. John's prescribed medications for  
16 Mr. Russell?

17 A. They have been offered to him, yes.

18 Q. In regards to psychiatric medications, has Mr. Russell  
19 been willing to take any of those medications?

20 A. He has not.

21 Q. Has he provided you with any rationale for why he's  
22 refusing those medications?

23 A. He does not believe that he is mentally ill and does not  
24 believe that he needs the medications.

25 Q. Are you aware if Mr. Russell was taking any medications

1 prior to being admitted to your facility?

2 A. According to the collateral that I have from his  
3 guardian, he has been on psychotropic medications in the past.  
4 There were a couple of examples of specific medications that he  
5 had been on, although, like I said, the collateral was a little  
6 bit unclear in terms of the spectrum of the medications or  
7 treatments that he has previously tried.

8 Q. Is Mr. Russell able to rationally participate in  
9 discussions about treatment options?

10 A. He is not.

11 Q. At the current time does Mr. Russell remain symptomatic?

12 A. He does.

13 Q. In your opinion, does Mr. Russell require further mental  
14 health treatment?

15 A. Yes.

16 Q. What types of treatment, in your opinion, does he  
17 require?

18 A. I'm recommending an inpatient level of care as well as  
19 psychotropic medications to treat his mood and his psychosis   
20 symptoms.

21 Q. If Mr. Russell does not receive the treatment, what  
22 would his prognosis be?

23 A. Poor. He has not demonstrated any significant  
24 improvements in his mental status throughout the hospitalization  
25 he's had so far. Also, in the instance where he has been acutely

1 threatening to staff and has received medications on emergent  
2 bases, he has demonstrated some improvement in his behavior and  
3 mood after receiving those medications.

4 Q. In your opinion, does Mr. Russell impose a substantial  
5 likelihood of harm to himself or others?

6 A. Yes.

7 Q. Please describe the basis for your opinion.

8 A. Again, with his level of disinhibition, irritability,  
9 the threats that he has made toward peers and staff, his lack of  
10 insight into his illness, and the decisions that he's making based  
11 off of psychotic thoughts, I believe that that presents a threat.

12 Q. Does Mr. Russell's mental illness impair his ability to  
13 meet his basic needs?

14 A. Yes.

15 Q. In what ways does it impair those -- his ability to  
16 acquire basic needs?

17 A. Given his current level of agitation and interactions  
18 with people, I don't see him being able to maintain housing or be  
19 able to stay in an environment around other people. His paranoia  
20 is so significant against, you know, group homes and things like  
21 that that I don't see him being able to cooperate enough to  
22 maintain that level of function right now.

23 Q. In your opinion, is commitment appropriate for  
24 Mr. Russell?

25 A. Yes.

1 Q. Are there any less restrictive alternatives that would  
2 be appropriate at this time?

3 A. No.

4 Q. Your facility -- I believe it was -- did you draft a  
5 petition for authorization to administer treatment?

6 A. Yes.

7 Q. That petition requests authorizations to administer  
8 psychotropic or neuroleptic medications; is that correct?

9 A. Yes.

10 Q. Are you familiar with such medications?

11 A. Yes.

12 Q. Generally, what is the objective of the use of such  
13 medications?

14 A. To stabilize a person's mood as well as treat the  
15 symptoms of psychosis, including delusion, hallucinations,  
16 disorganized speech and behavior.

17 Q. Are such medications generally accepted in the medical  
18 community?

19 A. Yes.

20 Q. Are they generally accepted for the treatment of  
21 Mr. Russell's mental illness?

22 A. Yes.

23 Q. Does Mr. Russell understand he's currently hospitalized?

24 A. He does not.

25 Q. Is he able to weigh the risks and benefits of treatment

1 with neuroleptic medications?

2 A. He is not.

3 Q. In your opinion, does Mr. Russell have the capacity to  
4 consent to administration of neuroleptic or psychotropic  
5 medications?

6 A. No.

7 Q. You probably already explained, but could you please one  
8 more time say why that's your opinion.

9 A. Right. So he does not have any insight into his  
10 illness, and as a result of his delusions, he can't participate in  
11 any type of a rational discussion about risks, benefits, and  
12 alternatives to medications. Typically, any conversation that I  
13 have with him is very short-lived. He storms away very quickly.  
14 So even from an, you know, ability to speak with me and tolerate  
15 that, we can't have that discussion right now.

16 Q. The petition lists, I believe, six different  
17 formulations of medications. Are there any medications not  
18 contained in the petition to administer treatment that you are  
19 requesting at this time?

20 A. No.

21 Q. Are the medications contained in the petition  
22 experimental in any way? 

23 A. They are not.

24 Q. How will you determine which medication or medications  
25 to administer to Mr. Russell?

1           A.     I will try to engage with him in a discussion about  
2 which he would prefer to try out of those options and work with  
3 him on that first. Based off of previous experiences, if he's  
4 unable to select a medication, I will, based off of side effects  
5 and previous responses to medications, select one of those  
6 medications to trial.

7           Q.     And you just mentioned side effects. Will Mr. Russell  
8 be monitored and treated for any side effects?

9           A.     He will.

10          Q.     Earlier you mentioned the lack of collateral  
11 information. Are you aware if Mr. Russell has received benefits  
12 previously from neuroleptic medications?

13          A.     There is some indication in past records that he has and  
14 has had periods of stability while medicated. And, again, just  
15 from my observations in the hospital when we've emergently had to  
16 medicate him, he does appear to respond.

17          Q.     What is Mr. Russell's prognosis if he does not receive  
18 psychotropic or neuroleptic medications?

19          A.     I would expect that he would continue to maintain a  
20 level of functioning that he's currently at or potentially  
21 deteriorate if he's not medicated.

22          Q.     In your opinion, do the benefits of neuroleptic  
23 medications outweigh the risks to Mr. Russell at this time?

24          A.     Yes.

25          Q.     Has Mr. Russell provided you any values such as social

1 or religious values that would impact his ability to take  
2 medications?

3 A. No.

4 Q. At this point, based on your knowledge and experience,  
5 are there any realistic alternatives to the use of neuroleptic  
6 medications? 

7 A. No.

8 Q. Thank you. I have no further questions.

9 THE COURT: Mr. Jones.

10 **CROSS-EXAMINATION**

11 BY MR. JONES:

12 Q. Doctor, this is David Jones. I'm representing the  
13 respondent in connection with this proceeding.

14 Whether the diagnosis is bipolar or schizoaffective,  
15 each would be a substantial psychiatric disorder. Would that be  
16 correct? 

17 A. Correct.

18 Q. And so the specific diagnosis is not critical at this  
19 point, simply a finding that he has a substantial psychiatric  
20 disorder. Would that be correct? 

21 A. Yes.

22 Q. Going forward with additional time to observe, could  
23 then a more definitive diagnosis could perhaps be obtained? 

24 A. Yes. If we can stabilize his mood in the hospital and  
25 observe that he is having ongoing psychosis despite significant

1 mood symptoms being well controlled, that would clarify whether  
2 there is a bipolar versus a schizoaffective diagnosis.

3 Q. There is a guardianship in place.

4 A. Yes.

5 Q. Would it be possible for the guardian to sign releases  
6 so that you could obtain additional history for my client?

7 A. Yes.

8 Q. I believe in your testimony you indicated that there  
9 were some occasions when emergency medications were provided to my  
10 client at Prairie St. John's; is that correct?

11 A. Correct.

12 Q. About how many times were emergency medications  
13 provided?

14 A. At the end of last week there were three instances where  
15 that occurred.

16 Q. What were the circumstances which gave rise to the  
17 emergency medications? 

18 A. Patient was threatening towards staff, spitting at  
19 staff, threatening to harm peers, threatening to harm staff, was  
20 not able to be redirected to his room or to a place to be able to  
21 calm down. He had ongoing severe agitation that disrupted the  
22 function of the unit and was to the point where we weren't able to  
23 redirect him in any other way.

24 Q. Would it be fair to say that emergency medications were  
25 required for both his safety as well as the safety of the staff? 

1 A. Yes.

2 Q. With respect to the Jarvis petition, there are a variety  
3 of drugs and dosages. Are you requesting at this time any changes  
4 or modifications to the drugs and dosages contained within the  
5 Jarvis petition?

6 A. I am not.

7 Q. And the neuroleptic medications that are indicated, you  
8 would consider those to be medically necessary at this time?

9 A. Yes.

10 Q. Thank you, Doctor.

11 MR. JONES: No further questions, Your Honor.

12 THE COURT: Mr. Ellison, any follow-up?

13 MR. ELLISON: Just one question, Your Honor.

14 **REDIRECT EXAMINATION**

15 BY MR. ELLISON:

16 Q. Doctor, in the Jarvis petition, just to make sure I'm  
17 clear, those are maximum dosages that you would administer; is  
18 that correct?

19 A. Correct.

20 Q. So you want the whole range from zero up to the maximum  
21 you listed?

22 A. Yes.

23 Q. Okay. Thank you. I have no further questions.

24 THE COURT: And just because I don't think it's on  
25 the record yet, and I know my pronunciation will be awful, looking

1 at the Jarvis petition there's a request for Zyprexa, Invega,  
2 Risperdal, Abilify. Anything else?

3 THE WITNESS: Those were the four.

4 THE COURT: All right. And those are both oral  
5 and intervenous, if necessary?

6 THE WITNESS: Correct.

7 THE COURT: Or short-term and long-term as  
8 necessary or appropriate?

9 THE WITNESS: Correct.

10 THE COURT: Any follow-up on that, Mr. Ellison?

11 MR. ELLISON: No, Your Honor.

12 THE COURT: Mr. Jones?

13 MR. JONES: Nothing further, Your Honor.

14 THE COURT: Okay. Thank you, Dr. Schock. You are  
15 welcome to stay or go about your day, however you wish.

16 Mr. Ellison, anything else for you today?

17 MR. ELLISON: Nothing else to present, Your Honor.

18 Petitioner rests.

19 THE COURT: Mr. Jones?

20 MR. JONES: No documents to offer. I do not know  
21 if my client is still present or if he's excused himself. I see  
22 Prairie St. John's shaking her head. Could she unmute and advise.

23 UNKNOWN SPEAKER: He briefly stepped back in the  
24 courtroom but then he left again.

25 MR. JONES: Your Honor, no objection to the Court

1 making a finding that my client has voluntarily waived his right  
2 to appear.

3 THE COURT: Thank you.

4 MR. JONES: And with that, the respondent would  
5 rest.

6 THE COURT: Any wish to make any further  
7 statements or arguments, Mr. Ellison?

8 MR. ELLISON: I don't think that's necessary, Your  
9 Honor. Your Honor has heard the testimony and has handled these  
10 type of cases before, so I don't need to make extensive argument.  
11 I'll leave that to Your Honor. Thank you.

12 THE COURT: Mr. Jones?

13 MR. JONES: I would ask the Court to make an  
14 independent determination based on the testimony and exhibits as  
15 to whether the criteria for commitment and Jarvis have been met.  
16 Thank you.

17 THE COURT: Thank you.

18 All right. The Court has had the benefit of  
19 Exhibits 1 through 4, testimony from Dr. Tomford and testimony  
20 from Dr. Schock. The Court also had the benefit of Mr. Russell  
21 being present this morning. He did leave shortly after the  
22 hearing commenced. I do find that he has waived his right to  
23 appear and testify.

24 I would note for the record that Mr. Russell on  
25 his own made a motion to the Court to examine witnesses on his

1 own. The Court heard from counsel, and the Court denies his  
2 request to examine counsel on his own.

3 The medical records were introduced on  
4 January 18th and 19th -- or were filed with the Court. He is  
5 currently at Prairie St. John's. I do find that all parties had  
6 proper notice of the hearing. I do find that Mr. Russell was, in  
7 fact, represented by counsel, who was very thorough and well  
8 experienced in this area of law.

9 I do find that Mr. Russell's commitment is based  
10 out of Winona County. I do find that there's clear and convincing  
11 evidence that he poses a risk of harm due to mental illness and  
12 that he does meet the criteria for statutory -- statutory criteria  
13 for civil commitment.

14 In addition to the testimony, when I look at  
15 Exhibit 1, which is Dr. Tomford's report, he refers there again to  
16 -- we've heard of Mr. Russell's concerns and opposition to a  
17 chemical lobotomy. Mr. Russell makes statements to the effect of,  
18 "I'd like to report I was trafficked by J.T., the chief justice of  
19 Winona County." Mr. Russell, also in that report, is recorded to  
20 have said, "I have telepathic stuff going on and I get messages  
21 throughout the country. I can also send messages and see two  
22 different people."

23 The Court has also carefully reviewed Exhibit 2.  
24 This would be in addition to the testimony from Dr. Schock and  
25 Prairie St. John's. It indicates that Mr. Russell does not

1 understand why he's there. He also believes that nobody believes  
2 him. "Patient says that he's still feeling frustrated; that if he  
3 has a way to do it he could end his life, but he would not do  
4 anything to hurt himself while in the hospital."

5 Later in that report: "Patient indicates he spent  
6 the week" -- "or it is indicated that he spent the weekend talking  
7 about how he knew how to kill himself and how to kill other  
8 people." He was generally disruptive and irritable. He also  
9 accuses the provider of wanting to shoot him up with a bunch of  
10 poison and substances illegally.

11 In Exhibit 3, which are the Mayo records, it  
12 indicates that "Patient has demonstrated symptoms consistent with  
13 diagnosis given, specifically persecutory delusions, that he will  
14 be tortured, and that he has been poisoned in the past." Also,  
15 there's indication -- I'm sorry. I put my Post-It in the wrong  
16 place.

17 I'm simply going to move on then. Exhibit 4 was  
18 from Horizon Homes. Indicated portion here is when he asked the  
19 staff, "Can you get me a gun so I can go back to Winona and blow  
20 my brains out?" And finally, the last portion is simply him  
21 indicating that he felt that he was, in fact, a slave.

22 The Court also finds that there's no less  
23 restrictive placement for him. I am aware that he has a guardian.  
24 I did also read in the reports that they tried to use the crisis  
25 center, and that was not successful. Medication management would

1 not work here. He had been at a group home. Outpatient would not  
2 work here given his strong opposition to medication necessary.

3 I also find by a preponderance of the evidence  
4 that he lacks the capacity to make decisions regarding the  
5 administration of his own medication. I'll make each of the  
6 findings that he does not demonstrate an awareness of his  
7 situation; that he does not demonstrate an understanding of the  
8 treatment, risks, or benefits; and that he has not communicated a  
9 clear choice regarding treatment with neuroleptic medication that  
10 is reasonable and not based on delusions.

11 I do find that the use of neuroleptic medications  
12 in this case is not experimental and there is not an available  
13 alternative. I do find all the witnesses to be credible and that  
14 they very closely matched the medical records during the time  
15 period before the Court. I have also gone over the specific  
16 medications in the Jarvis petition with Dr. Schock.

17 As indicated, I also do find that he's a danger to  
18 himself or others by the statements I've read. I will tell the  
19 parties I have one question, and it's at the end of the proposed  
20 order and I'm sorry I didn't ask it before. The proposed order  
21 has me reference a case manager from Winona County. In one of the  
22 medical records it indicated that he previously had a mental  
23 health case manager in Winona County; however, when that civil  
24 commitment expired, the case manager ended. Does he no longer  
25 have a case manager in Winona County?

1 MR. ELLISON: Your Honor, he did have -- when  
2 Mr. Russell was on commitment previously, he had one social worker  
3 who was his case manager through that commitment. When that  
4 commitment expired, he no longer wanted to work with that case  
5 manager so that ended.

6 The current practice in Winona County is through  
7 the commitment the social worker who brought the petition and  
8 worked with the prepetition screening process will become his new  
9 case manager. So he would have a case manager moving forward.

10 THE COURT: So he's not actually had one during  
11 this, kind of, pretrial period?

12 MR. ELLISON: Well, he -- I would say he has.  
13 Ms. Engel, who's on the hearing -- she's been working with the  
14 hospital and been in communication and aware of what's going on.  
15 So I would say she's been working as a case manager, if you want  
16 to use a technical term. I'm not sure when the exact date would  
17 have been, but she's been following up and monitoring this case  
18 the entire time.

19 THE COURT: Perfect.

20 Mr. Jones, any follow-up on that?

21 MR. JONES: No follow-up, Your Honor.

22 THE COURT: All right. So then I would include  
23 that the case manager in Winona County is Ms. Engel. She was  
24 present today for all of the testimony and the Court's findings  
25 here and the exhibits that the County has.

1                   To conclude, I am granting the civil commitment as  
2 requested by Winona County. I'm going to ask Mr. Ellison to draft  
3 that order.

4                   Is there anything else that you believe should be  
5 on the record today, Mr. Ellison?

6                   MR. ELLISON: Not that I can think of at this  
7 time, Your Honor. Thank you.

8                   THE COURT: Mr. Jones?

9                   MR. JONES: Your Honor, I believe the Court has  
10 made all of the required findings.

11                   THE COURT: Court clerk, anything that you believe  
12 is outstanding or I should review?

13                   COURT CLERK: No, Your Honor. Thank you.

14                   THE COURT: All right. If there's a short form or  
15 a short order that I do first, Mr. Ellison, just let the clerk  
16 know when it's ready for me and I'll be sure to get that signed  
17 for you. Okay?

18                   MR. ELLISON: Sounds great, Your Honor. Thank  
19 you.

20                   THE COURT: All right. Have a good day everyone.  
21 Thank you for your time.

22   - - -

23                   (Whereupon, the proceedings were adjourned at 11:49 a.m.)
